

Position Vacant

Vacancy ID: SERVICE TECHNICIAN/FITTER (2017012)

VLI is an OEM and market leader in the supply of specialised equipment and allied services used in the coal mining and bulk material handling industries globally. VLI is recognised as one of the world's largest underground in-seam directional drilling companies. A leader in the delivery of the associated equipment and services, VLI applies the highest level of quality and safety. As a market leader, VLI not only carries out the services contracts, but we design and build the equipment utilised.

Our NSW Drilling Division is currently seeking x 3 Service Technician/Fitters, to carry out repairs and overhauls on VLI Drilling Services equipment, including but not limited to In-seam Electro-Hydraulic Drill Systems, diesel underground equipment (Driftrunners and Jug-A-0's). The role requires the ability to be able to fault find hydraulic circuits, and to be able to carry out service, repairs in a safe manner to a high standard including the completion of all relevant documentation.

Based at our Beresfield Workshop, these permanent positions will involve a combination of site based work, and workshop duties as needed. You will receive a tool of trade vehicle, have accommodation and meals paid for when required to travel away, and have a work mobile phone.

To be considered for this role you will:

- Have Mechanical trade qualification
- Strong hydraulic knowledge (and qualifications)
- Previous experience with diesel mining equipment, drill rigs and and heavy underground equipment
- Strong attention to detail
- Possess a proactive commitment to their own, and their colleagues, Health and Safety in the Workplace

To Apply: If you are interested in applying for this role, please email your resume addressing the selection criteria, to: careers@vli.com.au and quote reference number: **2017012**.

Closing Date: 17 March 2017

VLI is an Equal Opportunity Employer
